BILSTEIN SHOCK ABSORBERS
How to Measure the Length of a Shock

Eye to Eye

An eye to eye shock is measured from the center of one eyelet to the center of the other eyelet.

Pin to Eye

A pin to eye shock is measured from the base of the stem where the mounting hardware rests to the center of the eyelet.

Pin to Pin

A pin to pin shock is measured from the base of the stem where the mounting hardware rests to the base of the other stem where the mounting hardware rests.
